

FIN301 Financial Instruments, Institutions and Markets

Level: 3

Credit Units: 5 Credit Units

Language: ENGLISH

Presentation Pattern: EVERY SEMESTER

Synopsis:

Financial Markets facilitate transfer of resources from savers and investors to the users of funds; they provide a forum for trading financial assets, discovery of prices, risk sharing and risk management, and mechanisms for transfer of ownership, control and governance. Thus, financial markets and the instruments traded therein play a vital role in meeting the fundamental economic objectives of mobilizing funds, allocating them efficiently, and monitoring their use. Financial institutions perform a vital role as intermediaries between savers and the ultimate investors. They are crucial for the efficient functioning and stability of an economy. This course provides a basic understanding of the significance of financial markets and financial institutions in the economy.

Topics:

- The Financial System
- Characteristics and Regulation of Financial Markets and Instruments
- Efficient Market Hypothesis
- Financial institutions – commercial banks, investment banks, unit trusts and mutual funds, insurance companies and pension funds
- Money market instruments – T-Bills, certificates of deposits, commercial papers, repos, – issue procedures – primary markets and secondary markets
