

LOG369 Contract Management for Supply Chains

Level: 3

Credit Units: 5 Credit Units

Language: ENGLISH

Presentation Pattern: EVERY JULY

Synopsis:

Contract management is essential for all business activities. It is important to assess and manage commercial and legal risks. For supply chain management, contract management is even more complicated as different stages of the supply chain may use a wide range of specific contracts, and thus special provisions and contracts are needed to manage unique legal risks. LOG369 Contract Management for Supply Chains aims to equip students with the necessary knowledge and skills to assess, draft and formulate supply chain contracts. The course will examine the theoretical, practical and legal aspects of contract management in the context of supply chain management. In light of the technological advances, the course will also examine and analyse key challenges and issues associated with the use of new technologies in contract management.

Topics:

- Formation of a Contract
- Vitiating Factors in a Contract
- Contractual Terms
- Specific Clauses for Contract Management
- Manufacturing Supply Contract
- Distribution Contract
- Sales of Goods Contract
- Sales Representative Contract
- Logistics Contract
- Insurance Contract
- Blockchain for Contract Management
- Artificial Intelligence for Contract Management

Learning Outcome:

- Examine the fundamental legal principles for contract management.
- Interpret the general and specific contract terms that manage legal risks and dispute resolutions.
- Draft specific contracts and impose appropriate terms for supply chain contracts.
- Propose specific contracts and provisions for sales and agency contracts.
- Apply specific contracts that manage legal and commercial risks in logistics.
- Analyse new technologies that will affect contract management.
