

PSS488e Integrated Public Safety and Security Management

Level: 4

Credit Units: 10 Credit Units

Language: ENGLISH

Presentation Pattern: EVERY JAN

E-Learning:

Synopsis:

PSS488 Integrated Public Safety and Security Management aims to provide the students with the analytical, formulation, and implementation tools related to safety and risk management. With the rapid changes to the type of security threats facing Singapore, students are required to think fast and work quickly to mitigate the risk and ensure public safety. Some of the topics covered in this course includes latest risk threats, management techniques, tools and strategies. Students will also be given case studies based on real-life events to further strengthen their knowledge and application of the various topics covered in this programme.

Topics:

- Topics covered will be based on the case studies and real-life scenarios.

Learning Outcome:

- Explain the different types of security threats
- Formulate ways to analyse the risk
- Evaluate strategies to manage risk
- Assess the risk management strategies
- Identify partnerships in risk management
- Construct plans and strategies to mitigate risk
