

PSY205 Social Psychology

Level: 2

Credit Units: 5 Credit Units

Language: ENGLISH

Presentation Pattern: EVERY SEMESTER

Synopsis:

Social psychology is the foundation course for many of the higher level psychology disciplines. The course explores the relationship between the individual and the social environment, including the groups they belong to and the way they think about themselves and how they are influenced by others. The topics include self and others perception, attributions, prejudice, social identity, compliance and conformity, interpersonal and intergroup relations. Emphasis is on the application of social psychological concepts and theories to everyday events and encounters.

Topics:

- Introduction to Social Psychology
- Understanding the Self in Social World
- Social Beliefs and Judgements
- Relationship between Behaviour and Attitudes
- Conformity and Obedience
- Persuasion
- Prejudice
- Aggression
- Interpersonal Attraction
- Helping Behaviour

Textbooks:

Myers, D.G.: Social psychology (eText) (13th Edition).(2020). New York: McGraw-Hill
ISBN-13: 9781260140569

Learning Outcome:

- Develop a better understanding of the social behaviour of the self
- Describe the important theories and concepts of social psychology
- Examine how the basic principles and theories of social psychology apply to our daily lives.
- Discuss how the different types of interpersonal relationships that people are involved in their daily lives develop and affect us.
- Apply the theories of social psychology to explain various real-life social phenomena, such as conformity, prejudice, persuasion, aggression, and helping behaviour.
- Analyze how certain theories of social psychology apply to the local Singapore context, and/or may not apply universally to all cultures.
